

Weekly Brief for the Week #9

(01/05/2023 to 05/05/2023)

Meeting with the Client	Yes
--------------------------------	-----

Sprint	3 -> 4
---------------	--------

1. Current Status

- This week we had a meeting with the client on the 04/05/2023 to discuss and present the work developed through Sprint 3.
- In the end of the meeting we asked Ines (INOVA+ employee) to do a set of guided task we had previously created. In the end of each task we asked some simple questions, that will allow us to collect some metrics.
- To further collect the INOVA+ opinion about our software we develop a Google Form we sent them in the end of the meeting
- For *Sprint 3*, we purposed the implementation of 20 user stories and some more fixes and enhancements the client requested on the *Sprint 2 Demo*. We did all the fixes and enhancements and a total of 19 user stories. There was one of them that could not be concluded in time.

2. Plans for the coming weeks

- Next week we won't meet with the client, although we will start to work on the Sprint 4.
- We will analyze the collected metrics to figure out what we can do to improve the software quality and performance. We plan to implement in Sprint 4 the needed changes accordingly to this.

3. Potential Risks

- As the project progresses, it's important to maintain the quality of the code, documentation, and testing. If quality issues arise, they may require additional time and resources to fix. So, we feel like we need to save some more time to, maybe, do a quality review on the code.
