

Weekly Brief for the Week #8

(24/04/2023 to 28/04/2023)

Meeting with the Client	No
--------------------------------	----

Sprint	3
---------------	---

1. Current Status

- For *Sprint 3*, we purposed the implementation of 20 user stories and some more fixes and enhancements the client requested on the *Sprint 2 Demo*.
- We have already done 6 of the 20 total user stories proposed for this Sprint and we are currently working on another 8 of them.

2. Plans for the coming weeks

- Next week we will meet with the client on the 04/05/2023 to present the work developed through Sprint 3. Then we will do a small retrospective for that sprint and start working on planning the next one.

3. Potential Risks

- As the project progresses, it's important to maintain the quality of the code, documentation, and testing. If quality issues arise, they may require additional time and resources to fix. So, we feel like we need to save some more time to, maybe, do a quality review on the code.
